BOERICKE & TAFEL'S HOMŒOPATHIC PUBLICATIONS.

ALLEN, DR. T. F. *The Encyclopedia of Pure Materia Medica; a Record of the Positive Effects of Drugs upon the Healthy Human Organism.* With contributions from Dr. Richard Hughes, of England; Dr. C. Hering, of Philadelphia; Dr. Carroll Dunham, of New York; Dr. Adolph Lippe, of Philadelphia, and others. X volumes. Price bound in cloth, \$60.00; in half morocco or sheep. . . . \$70 00

This is the most complete and extensive work on *Materia Medica* ever attempted in the history of medicine—a work to which the homœopathic practitioner may turn with the certainty of finding the whole pathogenetic record of any remedy ever used in homœopathy, the record of which being published either in bookform or in journals. The volumes average about 640 pages each. The work is now completed, and an index or symptom register to the *Encyclopedia* will be issued within a short time.

ALLEN AND NORTON. *Ophthalmic Therapeutics*, by Timothy F. Allen, M.D., Surgeon to the New York Ophthalmic Hospital, Professor of *Materia Medica* and Therapeutics in the New York Homœopathic Medical College. and Geo. S. Norton, M.D., Surgeon to the New York Ophthalmic Hospital, and Ophthalmic and Aural Surgeon to the Homœopathic Hospital on Ward's Island. 269 pages, 8vo. Cloth, . . . \$2.00

. . . "This work contrasts favorably with many similar treatises. It has not been written by inexperienced practitioners, but of men who write of that which they have seen—of that which they have accomplished. . . . It is, in short, a useful book, and as such we commend it to the study of our readers."—*Monthly Hom. Review*.

ANGELL, DR. H. C. *A Treatise on Diseases of the Eye; for the Use of Students and Practitioners.* By Henry C. Angell, M.D., Professor of Ophthalmology in the Boston University School of Medicine, etc., etc. Fifth edition, enlarged and illustrated. 343 pages. 12mo. Cloth, \$3 00

The fifth edition of this standard work has just been issued from the press, and shows that the whole work has been thoroughly revised and brought up to the latest dates in ophthalmology. Exquisite clear *photographic* illustrations have been added, and an exposition given of the dioptric or metric system, as applied to lenses for spectacles.

BAEHR, DR. B. *The Science of Therapeutics according to the Principles of Homœopathy.* Translated and enriched with numerous additions from Kafka and other sources, by C. J. HEMPEL, M.D. Two volumes. 1387 pages, \$9 00

. . . "In short Dr. Baehr has presented us with the results of his observations at the bedside rather than of his researches in the study. It is this which renders his work valuable, and which at the same time accounts for his occasional imperfections. We know

of no work of the kind in homœopathic literature where the suggestions for the choice of medicines are given in a fresher or clearer manner, or in one better calculated to interest and inform the practitioner. We have only to add that the two volumes are highly creditable to the publishers. The type is good, the paper good, and the binding excellent."—*Monthly Homœopathic Review*.

BELL, DR. JAMES B. The Homœopathic Therapeutics of Diarrhœa, Dysentery, Cholera, Cholera Morbus, Cholera Infantum, and all other loose evacuations of the bowels. 168 pages. Bound in Muslin. 12mo. Cloth, . \$1 00

This little book had a very large sale, and but few physicians' offices will be found without it. The work was, without exception, very highly commended by the homœopathic press.

BERJEAU, J. PH. The Homœopathic Treatment of Syphilis, Gonorrhœa, Spermatorrhœa, and Urinary Diseases. Revised, with numerous additions, by J. H. P. FROST, M.D. 256 pages. 12mo. Cloth, . \$1 50

"This work is unmistakably the production of a practical man. It is short, pithy, and contains a vast deal of sound practical instruction. The diseases are briefly described; the directions for treatment are succinct and summary. It is a book which might with profit be consulted by all practitioners of homœopathy."—*North American Journal*.

BREYFOGLE, DR. W. L. Epitome of Homœopathic Medicines. 383 pages, . \$1 25

Interleaved with writing paper. Half morocco, . \$2 25

We quote from the author's preface :

"It has been my aim, throughout, to arrange in as concise form as possible, the leading symptoms of all well-established provings. To accomplish this, I have compared Lippe's *Mat. Med.*; the *Symptomen-Codex*; *Jahr's Epitome*; *Bœnninghausen's Therapeutic Pocket-Book*, and *Hale's New Remedies*."

BRYANT, DR. J. A Pocket Manual, or Repertory of Homœopathic Medicine, Alphabetically and Nosologically arranged, which may be used as the Physicians' *Vade-mecum*, the Travellers' Medical Companion, or the Family Physician. Containing the Principal Remedies for the most important Diseases; Symptoms, Sensations, Characteristics of Diseases, etc.; with the Principal Pathogenetic Effects of the Medicines on the most important Organs and Functions of the Body, together with Diagnosis, Explanation of Technical Terms, Directions for the selection and Exhibition of Remedies, Rules of Diet, etc. Compiled from the best Homœopathic authorities. Third edition. 352 pages. 18mo. Cloth, . \$1 50

BUTLER, JOHN. A Text-Book of Electro-Therapeutics and Electro-Surgery, for the Use of Students and General Practitioners. By John Butler, M.D., L.R.C.P.E., L.R.C.S.I., etc., etc. Second edition, revised and enlarged. 350 pages. 8vo. Cloth, \$3 00

"Butler's work gives with exceptional thoroughness all details of the latest researches on

Electricity, which powerful agent has a great future, and rightly demands our most earnest consideration. But Homœopathia especially must hail with delight the advent from out the ranks of her apostles of a writer of John Butler's ability. His book will also find a large circle of non-homœopathic readers, since it does not conflict with the tenets of any therapeutic sect, and particular care has been bestowed on the technical part of electro-therapeia."—*Homœopathische Rundschau*.

DAKE, DR. WM. C. Pathology and Treatment of Diphtheria.

By Wm. C. Dake, M.D., of Nashville, Tenn. 55 pages. 8vo. Paper, 50 cts.

This interesting monograph was enlarged from a paper read at the Third Annual Meeting of the Homœopathic Society of Tennessee, held at Memphis, September 19, 1877.

It gives a report of one hundred and seventy-six cases treated during a period of eleven months. It well repays a careful perusal.

DUNHAM, CARROLL, A.M., M.D. Homœopathy the Science of Therapeutics. A collection of papers elucidating and illustrating the principles of homœopathy. 529 pages. 8vo. Cloth, . . . \$3 00

Half morocco, \$4 00

"After reading this work no one will attempt to justify the practice of alternation of remedies. It is simply the lazy man's expedient to escape close thinking or to cover his ignorance. The one remedy alone can be accurate and scientific; a second or third only complicates and spoils the case, and will inevitably ruin a good reputation. But to come to more practical matters, more than one-half of this volume is devoted to a careful analysis of various drug-provings. It teaches us *Materia Medica* after a new fashion, so that a fool can understand, not only the full measure of usefulness, but also the limitations which surround the drug. . . . We ought to give an illustration of his method of analysis, but space forbids. We can only urge the thoughtful and studious to obtain the book, which they will esteem as second only to the *Organon* in its philosophy and learning."—*The American Homœopathist*.

DUNHAM, CARROLL, A.M., M.D. Lectures on Materia Medica.

858 pages. 8vo. Cloth, \$5 00

Half morocco, \$6 00

. . . "Vol. I is adorned with a most perfect likeness of Dr. Dunham, upon which stranger and friend will gaze with pleasure. To one skilled in the science of physiognomy there will be seen the unmistakable impress of the great soul that looked so long and steadfastly out of its fair windows. But our readers will be chiefly concerned with the contents of these two books. They are even better than their embellishments. They are chiefly such lectures on *Materia Medica* as Dr. Dunham alone knew how to write. They are preceded quite naturally by introductory lectures, which he was accustomed to deliver to his classes on general therapeutics, on rules which should guide us in studying drugs, and on the therapeutic law. At the close of Vol. II we have several papers of great interest, but the most important fact of all is that we have here over fifty of our leading remedies presented in a method which belonged peculiarly to the author, as one of the most successful teachers our school has yet produced. . . . Blessed will be the library they adorn, and wise the man or woman into whose mind their light shall shine."—*Cincinnati Medical Advance*.

EGGERT, DR. W. The Homœopathic Therapeutics of Uterine and Vaginal Discharges. 543 pages. 8vo. Half morocco, \$3 50

The author brought here together in an admirable and comprehensive arrangement everything published to date on the subject in the whole homœopathic literature, besides embodying his own abundant personal experience. The contents, divided into eight parts, are arranged as follows:

PART I. Treats on *Menstruation and Dysmenorrhœa*; PART II. *Menorrhagia*; PART III. *Amenorrhœa*; PART IV. *Abortion and Miscarriage*; PART V.

Metrorrhagia; PART VI. *Fluor albus*; PART VII. *Lochia*; and PART VIII. *General Concomitants*. No work as complete as this, on the subject, was ever before attempted, and we feel assured that it will meet with great favor by the profession.

"The book is a counterpart of Bell on Diarrhœa, and Dunham on Whooping-cough. Synthetics, Diagnosis and Pathology are left out as not coming within the scope of the work. The author in his preface says: Remedies and their symptoms are left out, and the symptoms and their remedies have received sole attention—that is what the busy practitioner wants. The work is one of the essentials in a library."—*American Observer*.

"A most exhaustive treatise, admirably arranged, covering all that is known of therapeutics in this important department."—*Homœopathic Times*.

GUERNSEY, DR. H. N. *The Application of the Principles and Practice of Homœopathy to Obstetrics and the Disorders Peculiar to Women and Young Children.* By HENRY N. GUERNSEY, M.D., Professor of Obstetrics and Diseases of Women and Children in the Homœopathic Medical College of Pennsylvania, etc., etc. With numerous Illustrations. Third edition, revised, enlarged, and greatly improved. 1004 pages. 8vo. Half morocco, \$8 00

This standard work, with the numerous improvements and additions, is the most complete and comprehensible work on the subject in the English language. Of the previous editions, almost four thousand copies are in the hands of the profession, and of this third edition a goodly number have already been taken up. There are few other professional works that can boast of a like popularity, and with all new improvements and experiences diligently collected and faithfully incorporated into each successive edition, this favorite work will retain its hold on the high esteem it is held in by the profession, for years to come. It is superfluous to add that it was and is used from its first appearance as a text-book at the homœopathic colleges.

GUERNSEY, DR. E. *Homœopathic Domestic Practice.* With Full Descriptions to the Dose to each single Case. Containing also Chapters on Anatomy, Physiology, Hygiene, and an abridged *Materia Medica*. Tenth enlarged, revised, and improved edition. 653 pages. Half leather, \$2 50

GUERNSEY, DR. W. E. *The Traveller's Medical Repertory and Family Adviser for the Homœopathic Treatment of Acute Diseases.* 36 pages. Cloth, 30 cts.

This little work has been arranged with a view to represent in as compact a manner as possible all the diseases—or rather disorders—which the non-professional would attempt to prescribe for, it being intended only for the treatment of simple or acute diseases, or to allay the suffering in maladies of a more serious nature until a homœopathic practitioner can be summoned.

HAHNEMANN, DR. S. *The Lesser Writings of.* Collected and Translated by R. E. DUDGEON, M.D. With a Preface and Notes by E. MARCY, M.D. With a Steel Engraving of Hahnemann from the statue of Steinhauser. 784 pages. Half bound, \$3 00

This valuable work contains a large number of Essays, of great interest to laymen as well as medical men, upon Diet, the Prevention of Diseases, Ventilation of Dwellings, etc. As many of these papers were written before the discovery of the homœopathic theory of cure, the reader will be enabled to peruse in this volume the ideas of a gigantic intellect when directed to subjects of general and practical interest.

HAHNEMANN, DR. S. Organon of the Art of Healing. By SAMUEL HAHNEMANN. Aude Sapere. Fifth American edition, translated from the Fifth German edition, by C. WESSELHÆFT, M.D. 244 pages. 8vo. Cloth, \$1 75

This fifth edition of "Hahnemann Organon" has a history. So many complaints were made again and again of the incorrectness and cumbersome style of former and existing editions to the publishers, that, yielding to the pressure, they promised to destroy the plates of the fourth edition, and to bring out an entire re-translation in 1876, the Centennial year. After due consideration, and on the warm recommendation of Dr. Constantine Hering and others, the task of making this re-translation was confided to Dr. C. Wesselheft, and the result of years of labor is now before the profession, who will be best able themselves to judge how well he succeeded in acquitting himself of the difficult task.

"To insure a correct rendition of the text of the author, they (the publishers) selected as his translator Dr. Conrad Wesselheft, of Boston, an educated physician in every respect, and from his youth up perfectly familiar with the English and German languages, than whom no better selection could have been made." "That he has made, as he himself declares, 'an entirely new and independent translation of the whole work,' a careful comparison of the various paragraphs, notes, etc., with those contained in previous editions, gives abundant evidence; and while he has, so far as was possible, adhered strictly to the letter of Hahnemann's text, he has at the same time given a pleasantly flowing rendition that avoids the harshness of a strictly literal translation."—*Hahnemannian Monthly*.

HALE, DR. E. M. Lectures on Diseases of the Heart. In Three Parts. Part I. Functional Disorders of the Heart. Part II. Inflammatory Affections of the Heart. Part III. Organic Diseases of the Heart. Second enlarged edition printing.

HALE, DR. E. M. Materia Medica and Special Therapeutics of the New Remedies. Fourth edition, revised and enlarged. In two Volumes.

Vol. I. Special Symptomatology. With new Botanical and Pharmacological Notes. 672 pages. Cloth, \$5 00

Vol. II. Special Therapeutics. With Illustrative Clinical Cases. 900 pages. Second enlarged edition. Cloth, \$5 00

N. B.—Same in half morocco, per Volume, \$6 00

"Dr. Hale's work on *New Remedies* is one both well known and much appreciated on this side of the Atlantic. For many medicines of considerable value we are indebted to his researches. In the present edition, the symptoms produced by the drug investigated, and those which they have been observed to cure, are separated from the clinical observations, by which the former have been confirmed. That this volume contains a very large amount of invaluable information is incontestable, and that every effort has been made to secure both fulness of detail and accuracy of statement, is apparent throughout. For these reasons we can confidently commend Dr. Hale's fourth edition of his well-known work on the *New Remedies* to our homœopathic colleagues."—*Monthly Homœopathic Review*.

"We do not hesitate to say that by these publications Dr. Hale rendered an inestimable service to homœopathy, and thereby to the art of medicine. 'The school of Hahnemann in every country owes him hearty thanks for all this; and allopathy is beginning to share our gain.' The author is given credit for having in this fourth edition corrected the mistake for which the third one had been taxed rather severely, by restoring in Vol. II the 'special therapeutics,' instead of the 'characteristics' of the third edition."—*British Journal of Homœopathy*.

HALE, DR. E. M. The Medical, Surgical, and Hygienic Treatment of Diseases of Women, especially those causing Sterility, the Disorders and Accidents of Pregnancy, and Painful and Difficult Labor. By EDWIN M. HALE, M.D., Professor of Materia Medica and Therapeutics in the Chicago Homœopathic College, etc., etc. Second enlarged edition. 378 pages. 8vo. Cloth, . . . \$2 50

"This new work embodies the observations and experience of the author during twenty-five years of active and extensive practice, and is designed to supplement rather than supersede kindred works. The arrangement of the subjects treated is methodical and convenient; the introduction containing an article inserted by permission of Dr. Jackson, of Chicago, the author upon the ovular and ovulation theory of menstruation, which contains all the observations of practical importance known on this subject to date. The diseases causing sterility are fully described, and the medical, surgical, and hygienic treatment pointed out. The more generally employed medicines are enumerated, but their special or specific indications are unfortunately omitted. The general practitioner will find a great many valuable things for his daily rounds, and cannot afford to do without the book. The great reputation and ability of the author are sufficient to recommend the work, and to guarantee an appreciative reception and large sale."—*Hahnemannian Monthly*.

HAYWARD, DR. JOHN W. Taking Cold (the Cause of half our Diseases): Its Nature, Causes, Prevention and Cure; its frequency as a Cause of other Disease, and the Diseases of which it is the Cause, with their Diagnosis and Treatment. Fifth edition, enlarged and improved. London, 1875. 188 pages. 18mo. Cloth, . . . 50 cts.

We quote from the author's preface:

"This Essay was originally published under the conviction that, by attention to the directions it contains, persons may not only very frequently avoid taking cold, but may themselves frequently cure a cold at the onset, and thereby prevent the development of many of those serious diseases that would otherwise follow. The favorable reception it has met with is a sufficient testimony that it has been found useful."

HELMUTH, DR. W. T. A System of Surgery. Illustrated with 568 Engravings on Wood. By WM. TOD HELMUTH, M.D. Third edition. 1000 pages. Sheep, . . . \$8 50

This third edition of Dr. Helmuth's great work is already in appearance a great improvement over the old edition, it being well printed on fine paper, and well bound. By increasing the size of the page, decreasing the size of type, and setting up *solid*, fully one-half more printed matter is given than in the previous edition, albeit there are over 200 pages less. And while the old edition, bound in sheep, was sold at \$11.50 by its publishers, this improved third edition is now furnished at \$3 less, or for \$8.50. The author brought the work fully up to date, and for an enumeration of some of the more important improvements, we cannot do better than to refer to Dr. Helmuth's own Preface.

HEMPEL, DR. C. J. The Science of Homœopathy; or, A Critical and Synthetical Index of the Doctrines of the Homœopathic School. Second edition. 180 pages. Large 8vo. Cloth, . . . \$1 75

HEMPEL, DR. C. H. Complete Repertory of the Homœopathic Materia Medica. 1224 pages, . . . \$6 00

The object of this work is simply to make the finding of any symptom or group of symptoms, which a physician may be called upon to treat, a matter of perfect certainty; provided always such may exist among the results of our physiological provings. The classification of the symptoms which has been adopted is more complete, and at the same time more simple and practical, than anything of the kind ever published in our language.

HEMPEL, DR. C. J., and DR. J. BEAKLEY. Homœopathic Theory and Practice. With the Homœopathic Treatment of Surgical Diseases, designed for Students and Practitioners of Medicine, and as a Guide for an intelligent public generally. Fourth edition. 1100 pages, \$3 00

HERING, DR. C. Condensed Materia Medica. Second edition. More condensed, revised, enlarged, and improved, \$7 00

In February, 1877, we were able to announce the completion of Hering's *Condensed Materia Medica*. The work, as was to be expected, was bought up with avidity by the profession, and already in the Fall of 1878 the author set to work perfecting a second and improved edition. By still more condensing many of the remedies, a number of new ones could be added without much increasing the size and the price of the work. This new edition is now ready for the profession, and will be the standard work par excellence for the practitioner's daily reference.

HOLCOMBE, DR. W. H. Special Report of the Homœopathic Yellow Fever Commission, ordered by the American Institute of Homœopathy for presentation to Congress. 32 pages. 8vo. Paper, per 100, \$4.00, 5 cts.

This Report, written in Dr. Holcombe's masterly manner, is one of the best campaign documents for homœopathy. The statistics must convince the most skeptical, and every homœopathic practitioner should feel in duty bound to aid in securing its widest possible circulation.

HOMŒOPATHIC POULTRY PHYSICIAN (Poultry Veterinarian); or, Plain Directions for the Homœopathic Treatment of the most Common Ailments of Fowls, Ducks, Geese, Turkeys, and Pigeons, based on the author's large experience, and compiled from the most reliable sources, by Dr. Fr. Schröter. Translated from the German. 84 pages. 12mo. Cloth, 50 cts.

We imported hundreds of copies of this work in the original German for our customers, and as it gave good satisfaction, we thought it advisable to give it an English dress, so as to make it available to the public generally. The little work sells very fast, and our readers will doubtless often have an opportunity to draw the attention of their patrons to it.

HULL'S JAHR. *A New Manual of Homœopathic Practice,* Edited, with Annotations and Additions, by F. G. SNELLING, M.D. Sixth American edition. With an Appendix of the New Remedies, by C. J. HEMPEL, M.D. 2 vols. 2076 pages, \$9 00

The first volume, containing the symptomatology, gives the complete pathogenesis of two hundred and eighty-seven remedies, besides a large number of new remedies are added by Dr. Hempel, in the appendix. The second volume contains an admirably arranged Repertory. Each chapter is accompanied by copious clinical remarks and the concomitant symptoms of the chief remedies for the malady treated of, thus imparting a mass of information, rendering the work indispensable to every student and practitioner of medicine.

JAHR, DR. G. H. G. *Therapeutic Guide; the most Important Results of more than Forty Years' Practice.* With Personal Observations regarding the truly reliable and practically verified Curative Indications in actual cases of disease. Translated, with Notes and New Remedies, by C. J. HEMPEL, M.D. 546 pages, \$3 00

"With this characteristically long title, the veteran and indefatigable Jahr gives us another volume of homœopathics. Besides the explanation of its purport contained in the title itself, the author's preface still further sets forth its distinctive aim. It is intended, he says, as a 'guide to beginners, where I only indicate the most important and decisive points for the selection of a remedy, and where I do not offer anything but what my own individual experience, during a practice of forty years, has enabled me to verify as *absolutely decisive* in choosing the proper remedy.' The reader will easily comprehend that, in carrying out this plan, I had rigidly to exclude all cases concerning which I had no experience of *my own* to offer. We are bound to say that the book itself is agreeable, chatty, and full of practical observation. It may be read straight through with interest, and referred to in the treatment of particular cases with advantage."—*British Journal of Homœopathy*.

JAHR, DR. G. H. G. *Clinical Guide, or Pocket Repertory for the Treatment of Acute and Chronic Diseases.* Translated by C. J. HEMPEL, M.D. Second American revised and enlarged edition. From the third German edition, enriched by the addition of the New Remedies. By S. LILIENTHAL, M.D. 624 pages. 12mo. Half morocco. \$2 50

"To those of our readers who have used the old edition, nothing need be said to induce them to procure a copy of the new. To others, however, we feel free to state that as a volume of ready reference to lie on the office desk, or be used at the bedside, it is very valuable, and will save many tedious and distracting hunts through the *symptomen codex*. The typographical execution of the book is excellent."—*Hahnemannian Monthly*.

JAHR, DR. G. H. G. *The Homœopathic Treatment of Diseases of Females and Infants at the Breast.* Translated from the French by C. J. HEMPEL, M.D. 422 pages. Half leather, \$2 00

This work deserves the most careful attention on the part of homœopathic practitioners. The diseases to which the female organism is subject are described with the most minute correctness, and the treatment is likewise indicated with a care that would seem to defy criticism. No one can fail to study this work but with profit and pleasure.

JAHR, DR. G. H. G. *Diseases of the Skin; or, Alphabetical Repertory of the Skin Symptoms, and External Alterations of Substance, together with the Morbid Phenomena observed in the Glandular, Osseous, Mucous, and Circulatory Symptoms. Arranged with Pathological Remarks on Diseases of the Skin.* Edited by C. J. HEMPEL, M.D. 515 pages. 12mo. Cloth, \$1 50

JAHR, DR. G. H. G. *The Venereal Diseases, their Pathological Nature, Correct Diagnosis, and Homœopathic Treatment.* Prepared in accordance with the author's own, as well as with the experience of other physicians, and accompanied with critical discussions. Translated, with numerous and important additions, from the works of other authors, and from his own experience. By C. J. HEMPEL, M.D. 428 pages. 8vo. Cloth, \$3 00

This is the most elaborate treatise on the subject in print. The work is divided into four divisions, of which the first treats on Primary Forms of Venereal Diseases, in four chapters: On the Venereal Phenomena in general; the Different Forms of Gonorrhœa; the Various Forms of Chancre; and other Primary Forms of Syphilis. The second division, on Secondary Forms of Syphilis, treats in three chapters, of Secondary Syphilis generally; Syphilitic Cutaneous Affections, and Intermediate Forms of Syphilis. The third division: General Pathological Observations on Syphilis and its course generally, in three chapters; Pathological Nature and Origin of Syphilis; on Venereal Contagia; General Development, Course, and Termination of Syphilis. The fourth division: General Therapeutic Observations on the Treatment of Syphilis; General Diagnostic Remarks; General Therapeutic Observations; Pharmacodynamic Observations, and Addenda.

JONES, DR. SAMUEL A. *The Grounds of Homœopathic Faith.* Three Lectures, delivered at the request of Matriculates of the Department of Medicine and Surgery (Old School) of the University of Michigan. By SAMUEL A. JONES, M.D., Professor of Materia Medica, Therapeutics, and Experimental Pathogenesis in the Homœopathic Medical College of the University of Michigan, etc., etc. 92 pages. 12mo. Cloth, per dozen, \$3; per hundred, \$20, 30 cts.

Lecture first is on *The Law of Similars; its Claim to be a Science in that it Enables Perversion.* Lecture second, *The Single Remedy a Necessity of Science.* Lecture third, *The Minimum Dose an Inevitable Sequence.* A fourth Lecture, on *The Dynamization Theory*, was to have finished the course, but was prevented by the approach of final examinations, the preparation for which left no time for hearing evening lectures. The *Lectures* are issued in a convenient size for the coat-pocket; and as an earnest testimony to the truth, we believe they will find their way into many a homœopathic household.

JOHNSON, DR. I. D. *Therapeutic Key; or Practical Guide for the Homœopathic Treatment of Acute Diseases.* Third edition. 312 pages. Bound in linen, \$1 50
Bound in flexible cover, \$2 00

This has been one of the best selling works on our shelves; more copies being in circulation of this than of any two other professional works put together. It is safe to say that there are but few homœopathic practitioners in this country but have one or more copies of this little remembrancer in their possession.

JOHNSON, DR. I. D. *A Guide to Homœopathic Practice.* Designed for the use of Families and Private Individuals. 494 pages. Cloth, \$2 00

This is the latest work on Domestic Practice issued, and the well and favorably known author has surpassed himself. In his book fifty-six remedies are introduced for internal application, and four for external use. The work consists of two parts. Part I is subdivided into seventeen chapters, each being devoted to a special part of the body, or to a peculiar class of disease. Part II contains a short and concise *Materia Medica*, *i. e.*, gives the symptoms peculiar to each remedy. The whole is carefully written with a view of avoiding technical terms as much as possible, thus insuring its comprehension by any person of ordinary intelligence. A complete set of remedies in vials holding over fifty doses each, is furnished for \$7, or in vials holding over one hundred doses each for \$10, or book and case complete for \$9 or \$12 respectively. Address orders to Boericke & Tafel's Pharmacies at New York, Philadelphia, Baltimore, Chicago, New Orleans, or San Francisco.

JOSLIN, DR. B. F. Principles of Homœopathy. In a Series of Lectures. 185 pages. 12mo. Cloth, 60 cts.

JOSLIN, DR. B. F. Homœopathic Treatment of Epidemic Cholera. Third edition, with additions. 252 pages. 12mo. Cloth, 75 cts.

This work offers the advantage of a threefold arrangement of the principal medicines, *viz.*, with reference, I—to the varieties of cholera; II—to its stages; and III—to its symptoms as arranged in repertories. These last will give the work a permanent value in treating the more frequent complaints of summer.

LAURIE AND McCLATCHEY. The Homœopathic Domestic Medicine. By JOSEPH LAURIE, M.D. *Ninth American*, from the Twenty-first English edition. Edited and revised, with numerous and important additions, and the introduction of the new remedies. By R.J. McCLATCHEY, M.D. 1044 pages. 8vo. Half morocco, \$5 00

"We do not hesitate to indorse the claims made by the publishers, that this is the most complete, clear, and comprehensive treatise on the domestic homœopathic treatment of diseases extant. This handsome volume of nearly eleven hundred pages is divided into six parts. *Part one* is introductory, and is almost faultless. It gives the most complete and exact directions for the maintenance of health, and of the method of investigating the condition of the sick, and of discriminating between different diseases. It is written in the most lucid style, and is above all things wonderfully free from technicalities. *Part two* treats of symptoms, character, distinctions, and treatment of general diseases, together with a chapter on casualties. *Part three* takes up diseases peculiar to women. *Part four* is devoted to the disorders of infancy and childhood. *Part five* gives the characteristic symptoms of the medicines referred to in the body of the work, while *Part six* introduces the repertory."—*Hahnemannian Monthly*.

"Of the usefulness of this work in cases where no educated homœopathic physician is within reach, there can be no question. There is no doubt that domestic homœopathy has done much to make the science known; it has also saved lives in emergencies. The practice has never been so well presented to the public as in this excellent volume."—*New Eng. Med. Gazette*.

A complete set of remedies of one hundred and four vials, containing over fifty doses each, is furnished for \$12, put up in an elegant mahogany case. A similar set in vials containing over one hundred doses each, is furnished for \$18, or book and case complete for \$17 or \$23 respectively. Address orders to Boericke & Tafel's Pharmacies at New York, Philadelphia, Baltimore, Chicago, New Orleans, or San Francisco.

LILIETHAL, DR. S. Homœopathic Therapeutics. By S. LILIETHAL, M.D., Editor of North American Journal of Homœopathy, Professor of Clinical Medicine and Psychology in the New York Homœopathic Medical College, and Professor of Theory and Practice in the New York College Hospital for Women, etc. Second edition. 8vo, \$5 00
Half morocco, \$6 00

"Certainly no one in our ranks is so well qualified for this work as he who has done it, and in considering the work done, we must have a true conception of the proper sphere of

such a work. For the fresh graduate, this book will be invaluable, and to all such we unhesitatingly and very earnestly commend it. To the older one, who says he has no use for this book, we have nothing to say. He is a good one to avoid when well, and to dread when ill. We also hope that he is severely an *unicum*."—*Prof. Sam. A. Jones in American Homœopathist*.

"It is an extraordinary useful book, and those who add it to their library will never feel regret, for we are not saying too much in pronouncing it the *best work on therapeutics* in homœopathic (or any other) literature. With this under one elbow, and Hering's or Allen's *Materia Medica* under the other, the careful homœopathic practitioner can refute Neimayer's too confident assertion, 'I declare it idle to hope for a time when a medical prescription should be the simple resultant of known quantities.' Doctor, by all means buy Lilienthal's *Homœopathic Therapeutics*. It contains a mine of wealth."—*Prof. Chas. Gatchel in Ibid.*

LUTZE, DR. A. Manual of Homœopathic Theory and Practice. designed for the use of Physicians and Families. Translated from the German, with additions by C. J. HEMPEL, M.D. From the sixtieth thousand of the German edition. 750 pages. 8vo. Half leather, \$2 50

This work, from the pen of the late Dr. Lutze, has the largest circulation of any homœopathic work in Germany, no less than sixty thousand copies having been sold. The introduction, occupying over fifty pages, contains the question of dose, and rules for examining the patient, and diet; the next sixty pages contain a condensed pathogenesis of the remedies treated of in the work; the description and treatment of diseases occupy four hundred and eighteen pages, and the whole concludes with one hundred and seventy-three pages of repertory and a copious index, thus forming a concise and complete work on theory and practice.

MALAN, H. Family Guide to the Administration of Homœopathic Remedies. 112 pages. 32mo. Cloth, 30 cts.

MANUAL OF HOMŒOPATHIC VETERINARY PRACTICE.

Designed for all kinds of Domestic Animals and Fowls, prescribing their proper treatment when injured or diseased, and their particular care and general management in health. Second and enlarged edition. 684 pages. 8vo. Half morocco, \$5 00

"In order to rightly estimate the value and comprehensiveness of this great work, the reader should compare it, as we have done, with the best of those already before the public. In size, fulness, and practical value it is head and shoulders above the very best of them, while in many most important disorders it is far superior to them altogether, containing, as it does, recent forms of disease of which they make no mention."—*Hahnemannian Monthly*.

MARSDEN, DR. J. H. Handbook of Practical Midwifery, with full instructions for the Homœopathic Treatment of the Diseases of Pregnancy, and the Accidents and Diseases incident to Labor and the Puerperal State. By J. H. MARSDEN, A.M., M.D. 315 pages. Cloth, \$2 25.

"It is seldom we have perused a textbook with such entire satisfaction as this. The author has certainly succeeded in his design of furnishing the student and young practitioner, within as narrow limits as possible, all necessary instruction in practical midwifery. The work shows on every page extended research and thorough practical knowledge. The style is clear, the array of facts unique, and the deductions judicious and practical. We are particularly pleased with his discussion of the management of labor, and the management of mother and child immediately after the birth, but much is left open to the common-sense and practical judgment of the attendant in peculiar and individual cases."—*Homœopathic Times*.

MOHR, DR. CHARLES. *The Incompatible Remedies of the Homœopathic Materia Medica.* By CHARLES MOHR, M.D., Lecturer of Homœopathic Pharmaceutics, Hahnemann Medical College, Philadelphia. (A paper read before the Homœopathic Medical Society of the County of Philadelphia) Pamphlet, in paper cover, . 10 cts.

This is an interesting paper, which will well repay perusal and study. It gives a list of fifty-seven remedies and their incompatibles, diligently collated from the best-known sources.

MORGAN, DR. W. *The Homœopathic Treatment of Indigestion, Constipation, and Hæmorrhoids.* Edited with Notes and Annotations by A. E. SMALL, M.D. 166 pages 12mo. Cloth. 60 cts.

Diseases resulting from irregularity or debility of the digestive organs are so frequent in their occurrence, that scarcely a family can be found in which one or more of its members are not sufferers thereby. The present work gives in a concise manner the hygienic measures as well as the medical treatment that should be observed, calculated not only to obviate the necessity of recourse to dangerous palliatives, but to promote a complete restoration of health.

MORGAN, DR. W. *The Textbook for Domestic Practice; being plain and concise directions for the Administration of Homœopathic Medicines in Simple Ailments.* 191 pages. 32mo. Cloth, . 50 cts.

PHYSICIAN'S VISITING LIST AND POCKET REPERTORY, THE HOMŒOPATHIC. By ROBERT FAULKNER, M.D. Second edition, \$2 00

"Dr. Faulkner's Visiting List is well adapted to render the details of daily work more perfectly recorded than any book prepared for the same purpose with which we have hitherto met. It commences with Almanacs for 1877 and 1878; then follow an obstetric calendar; a list of Poisons and their Antidotes; an account of Marshall Hall's ready method in Asphyxia; a Repertory of between sixty and seventy pages; pages marked for general memoranda; Vaccination Records; Record of Deaths; Nurses; Friends and others; Obstetric

Record, which is especially complete; and finally, pages ruled to keep notes of daily visits, and also spaces marked for name of the medicine ordered on each day. The plan devised is so simple, so efficient, and so clear, that we illustrate it on a scale just half the size of the original (here follows illustration). The list is not divided into special months, but its use may be as easily commenced in the middle of the year as at the beginning. We heartily recommend Faulkner's List to our colleagues who may be now making preparations for the duties of 1878."—*Monthly Homœopathic Review, London.*

HOMŒOPATHIC JOURNALS.

THE NORTH AMERICAN JOURNAL OF HOMŒOPATHY.

SAMUEL A. LILIENTHAL, M.D., Editor. Boericke & Tafel, Publishers.

Quarterly. Subscription price per year, payable in advance. \$4 00

This is the oldest Homœopathic Journal in this country, being now in its twenty-seventh year. The first volume was published in 1851, under the editorship of C. Hering, M.D., of Philadelphia; E. E. Marey, M.D., and J. W. Metcalfe, M.D., of New York. In 1856, E. E. Marey and J. C. Peters, M.D., of New York; Wm. H. Holcombe, M.D., of Waterproof, La., and H. C. Preston, M.D., of Providence, R. I., appear as editors. In 1860, Dr. J. C. Peters, with a corps of assistant editors, assumed charge; and from 1861 until 1869 the late Dr. F. W. Hunt virtually edited the Journal, although his name did not always appear as such. In 1870, Dr. S. Lilienthal became associated with Dr. Hunt as co-editor, and since 1871 Dr. Samuel A. Lilienthal took sole charge of the Journal.

The Journal had its ups and downs during the long years of its existence, but under the administration of indefatigable Dr. Lilienthal it entered on a career of prosperity such as it never enjoyed before, and it is safe to say that it never before had as many friends, as valuable original or translated articles, and as large a subscription list.

The Twenty-eighth Volume of this Journal commences in August, 1879. Subscriptions please address to the publication office as follows:
